DETAILED ACTION***Election/Restrictions***

1. This application contains claims directed to the following patentably distinct species of the claimed invention: Species I - Figs. 1, 2 (ring 38 with first and second apertures 40, 42); Species II - Fig. 3 (ring 38' with first and second apertures 40 and 42, first and second ring pieces 44 and 46 coupled with screws 48); and Species III - Fig. 4 (ring 52 with aperture 54 for encircling support 55, a plurality of apertures 56 with first diameter, a second plurality of apertures 58 with a second diameter, plurality of clips 60, safety lines 62).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic (Species I - claims 1-6, 8, 10, 16, 23-25; Species II - claims 1, 2, 4, 5, 7-16, 23, 25; and Species III - claims 17-22).

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
